Разработка веб-приложения с использованием технологии ASP.NET	Дата отчёта	
	Оценка	
	Подпись	

Цель: получить практические навыки создания многостраничных веб-приложений и реализации обмена информацией между страницами.

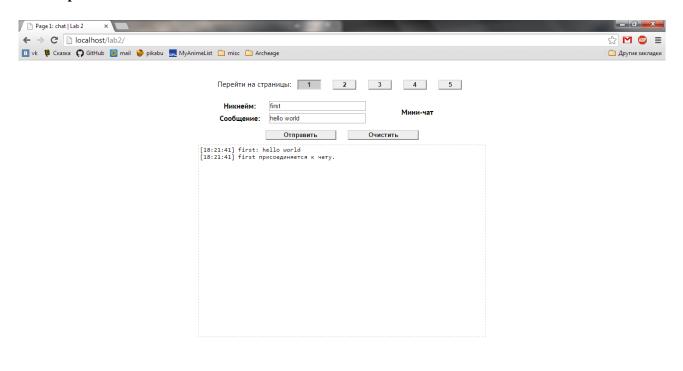

Задание: разработайте прикладной веб-сайт, удовлетворяющий следующим требованиям. Он должен иметь:

- не менее пяти веб-форм, связанных между собой гиперссылками;
- не менее 10 элементов управления на каждой веб-странице, включая элементы ввода информации;
- не менее 5 методов обработки событий для каждой веб-страницы.

Реализовать механизм передачи информации между страницами с использованием переменной сессии.

Выполнение лабораторной работы:
